### **DETAILED ACTION**

1. This Office Action is responsive to the Amendment filed September 29, 2005. The Examiner acknowledges the cancellation of claims 1, 3 and 5. The Examiner further acknowledges the addition of new claims 25-44. Claims 25-44 are pending.

#### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 25-42, drawn to systems for thermally mapping a vessel wall in the body of a patient, classified in class 604, subclass 96.01.
  - II. Claims 43-44, drawn to a method of thermally mapping a vessel wall, classified in class 600, subclass 549.
3. The inventions are distinct, each from the other because of the following reasons:
- Inventions II and I are related as process and apparatus for its practice, respectively. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be performed by a materially different apparatus, such as by using at least one thermal sensor mounted on a guidewire or catheter that lacks an expansion device, where the effect of blood flow is altered by applying thermal stimulation, such as a cold compress, to the exterior of the patient.

Art Unit: 3736

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Bruce Canter on December 6, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Charles A. Marmor, II whose telephone number is (571) 272-4730. The examiner can normally be reached on M-TH (7:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (571) 272-4726. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
